

ABOUT US

Universal Wellhead Services, LLC "UWS" was formed April 2010, providing drilling and completion designs, new and remanufactured wellhead equipment, and service personnel to the oil and gas industry. Our primary focus is the sale and installation of wellhead equipment, ancillary product lines which include valves, manifolds, frac trees, repair, remanufacture, and field service. Our products are used both in the drilling and completion phases of the oil and gas industry.

UWS has in-house machine capabilities which allows us to quickly and efficiently repair existing customer-owned wellheads. We maintain computer-generated inventory programs that enable us to utilize our customers' inventory while providing them with detailed accurate inventory reports.

UWS has offices and full-service shops based in Corpus Christi, Odessa, Houston, Texas; Shreveport, Louisiana; Newcomerstown, Ohio.

OUR MISSION

Universal Wellhead Services Holdings, LLC is the premier Wellhead provider for Drilling, Completion, Production and Work Over Operations in the U.S.A.; focusing on safety, professionalism, utilization of extensive field, engineering and application experience while supplying the highest quality and most reliable Wellhead Components in the Oil and Gas Industry.

OUR VISION

Universal Wellhead Services' vision is to become the Nation's premier wellhead service company, by providing innovative solutions, superior customer service, and operating with unwavering ethical and safety standards in the Oil and Gas Industry.

OUR VALUES

Universal Wellhead Services' core values are the foundation of our company, essential to our success and serve as the lens through which we evaluate every business decision. Our commitment to these values, in both words and actions, builds a stronger, healthier company. Guided by our values of safety, excellence, experience, and innovation, UWS works hard to earn the high regard of our clients. Our values promote trust, openness, teamwork and professionalism, as well as pride in what we do and how we conduct business.

OUR PRODUCTS AND SERVICES

We purchase many wellheads and valve components from third-party providers. All of our providers are known to us personally, some for as long as forty years. Each provider we use manufactures all our products to our specific material specifications and machine drawings. We have personally inspected most of their facilities and have reviewed their QA/QC programs.

All wellhead components and valves are manufactured to current API-6A specs. We supply the FC and FLS model gate valves for all high pressure applications and for our frac valve use. The FLS valve is the current leader in the valve industry and allows for low operating torque, low pressure sealing, bi-directional installation, metal-to-metal back seating and ease of repair. We offer the Type "M" wedge gate valve profile for lower pressure applications. All frac valves sent to the field will have certifications and test charts. Our wellhead is the C-22 profile, the most widely used in the industry.

We have the capability of manufacturing most components in-house for specialty items or emergency basis, but usually purchase from outside sources to provide the best value for our clients. We also offer remanufactured wellheads and gate valves as a low-cost option. These items are completely

gone through and leave our facilities with a one year warranty. We repair most brands and models of wellheads and gate valves, each leaving our facility with the same one year warranty.

Ancillary products, such as secondary seals, casing hangers, tubing hangers, etc. are purchased from local manufacturers. These products are made to our explicit specifications and drawings. We stock a wide range of locally sourced elastomers in all trim and temperature ratings.

OUR SAFETY

UWS has a relentless commitment to the health and safety of our employees and clients, devoted to maintaining the highest levels of safety and strive for zero incidents, injuries and illnesses. We recognize that we earn the right to operate every day by developing our assets responsibly and in an environmentally sound way. All of our employees are trained in current worksite safety procedures as well as how to work safely with certified, properly maintained equipment. We know that by keeping our team safe, we are able to keep our customers' operations moving forward.

We are members of Avetta, ISN and Veriforce, and proudly align our standards with theirs to enhance safety for our workforce and the communities in which we serve.
